Partners In Care generates \$10.2M in Gross Savings Over Three-Year Period as part of Horizon Blue Cross Blue Shield of New Jersey Value-Based Network

East Brunswick, NJ... Partners In Care (PIC), a clinically integrated network powered by Continuum Health, announced today that it generated \$10.2 million in gross savings from 2016-2018, and lowered the medical cost trend by \$17 per member per month (PMPM) during performance year 2018 as part of Horizon Blue Cross Blue Shield of New Jersey's (Horizon BCBSNJ) value-based program. PIC providers and Continuum Health's population health management team – which also drives high performance for New Jersey's fastest growing independent medical group, Consensus Health – improved quality and reduced avoidable utilization for more than 35,000 Horizon BCBSNJ members. Targeted efforts by PIC providers and Continuum Health's population health team promoted high quality outcomes, as well as a 10% reduction in hospital admissions and a 20% reduction in sub-acute admissions (e.g. skilled nursing facilities).

Approximately 1.8 million of Horizon BCBSNJ's members are attributed to patient-centered, value-based providers, who are collaborating with Horizon to deliver improved health care quality, greater affordability, and an enhanced customer experience.

"We are committed to improving the value that patients, physicians and payers receive. Our providers and care team members know that when we improve health outcomes and lower costs, everyone wins," stated John Brault, CEO of PIC and SVP of Payer Strategy for Continuum Health.

About Partners In Care (PIC)

Partners In Care is a clinically integrated network, which includes providers from Consensus Health, New Jersey's fastest growing, independent multi-specialty medical group. Formed in 1995 and now a Continuum Health affiliate, PIC now includes more than 500 primary care and specialty providers in 14 counties across the state who consistently deliver higher quality care at a lower overall cost for thousands of patients.
